

Dhebobrotha Dhibo

Cybersecurity Analyst

Email: ddhibboreal@gmail.com

Phone: 647-673-2363

Professional Summary

- Aspiring Cybersecurity Professional with over 7 years of experience in IT and telecommunications and 4+ years in customer service.
- Bachelor's degree in computer science & engineering, currently studying Cybersecurity & postgraduate in Creative Advertising, with a focus on network security and information security.
- Knowledgeable in network security concepts, TCP/IP, firewalls, VPNs, and basic security tools, with hands-on experience in troubleshooting and analyzing network and system issues.
- Proven ability to analyze incidents, perform root cause analysis, and support secure, high-availability environments.
- Currently advancing expertise in enterprise networking, including network segmentation, cloud networking, and security best practices.

Technical Skills

- **Networking & Infrastructure:** TCP/IP, DNS, DHCP, VLANs, WAN/LAN, VPN; Routing & Switching (basic); Network Monitoring, Traffic Analysis, Packet Inspection.
- **Network Security:** Firewalls, IDS/IPS, VPNs, Network Segmentation, Secure Network Design, Threat Detection, Vulnerability Management.
- **Tools & Technologies:** Wireshark, Nmap, Basic SIEM tools, Endpoint protection tools, Network Diagnostics: ping, traceroute, ipconfig
- **Operating Systems:** Windows, Windows Server, Linux (basic administration), Cloud Environments (AWS/Azure)
- **Incident Response:** Log Analysis, Identifying Suspicious Activity, Reporting Security Events.

Work Experience

Cybersecurity Specialist

Freelance / Projects

Jan 2026 – Present

Winnipeg, MB

- Identified and documented network vulnerabilities using tools like Nmap and Wireshark.
- Configured secure VPN connections and firewall rules to protect digital assets.
- Conducted phishing simulation and analysis to improve organizational security posture.
- Documented security incidents and performed root cause analysis for technical problems.

Data Analyst

TELUS Digital

Feb 2025– Present

Winnipeg, MB

- Utilize Open-Source Intelligence (OSINT) techniques to conduct in-depth web research.
- Perform cross-source data validation to mitigate inaccurate data, ensuring the Confidentiality, Integrity, and Availability (CIA) of mapping systems.
- Apply strong analytical and problem-solving skills to maintain high-quality mapping standards.

Security Professional

Oct 2025 – Present

GardaWorld

Winnipeg, MB

- Monitor physical and digital surveillance infrastructure to detect and respond to unauthorized intrusions.
- Execute incident response protocols across diverse environments.
- Maintain high situational awareness to identify environmental vulnerabilities.

Education

Applied Computer Science, Computer Science

Winnipeg, MB

The University of Winnipeg

Computer Science & Engineering (CSE)

Bangladesh

Leading University

Creative Advertising (CAB)

Toronto, ON

Seneca Polytechnic

Certifications: ISC2 Certified in Cybersecurity (CC), Certified Ethical Hacker by Cisco, Endpoint Security by Cisco, Cybersecurity training from Bangladesh Computer Council, SAP Certification, Preparing for CCNA by Cisco.

Projects

VulnScanner - Automated Vulnerability Scanner

Mar 2026

GitHub: [Project](#)

Winnipeg, MB

- Developed tool to perform TCP port scanning across 34 common ports with service detection.
- Implemented network-level analysis including DNS, MX, SPF, DMARC, and DKIM validation
- Evaluated security configurations ex, TLS protocols, cipher strength, and certificate validity
- Conducted security header analysis (HSTS, CSP, CORS, X-Frame-Options)
- Simulated real-world vulnerability detection and network reconnaissance techniques
- Demonstrates practical understanding of network protocols, scanning, and infrastructure security
